

Humeral shaft (*Frozen*)

Description	dimensions			
	(L)	(W)	(T)	(D')
	cm	mm	mm	mm
550573 Humeral cortical shaft 15 cm	14.9-15.1	18.0-25.0	3.0-12.0	2.0-19.0

Processing Specifications

Shafts consist of 90% cortical and may have some residual cancellous in the medullary canal.

Measurements

- L overall length
- T Cortical wall thickness
- W' smallest width of the shaft at any one measure
- D' maximum inner canal diameter measured medial to lateral
